

GENERATIVE AI SERIES: DAY 10

Mastering ChatGPT: Tips, Tricks & Plugins!

Go from casual user to ChatGPT power-user! ✨

@learn.machinelearning

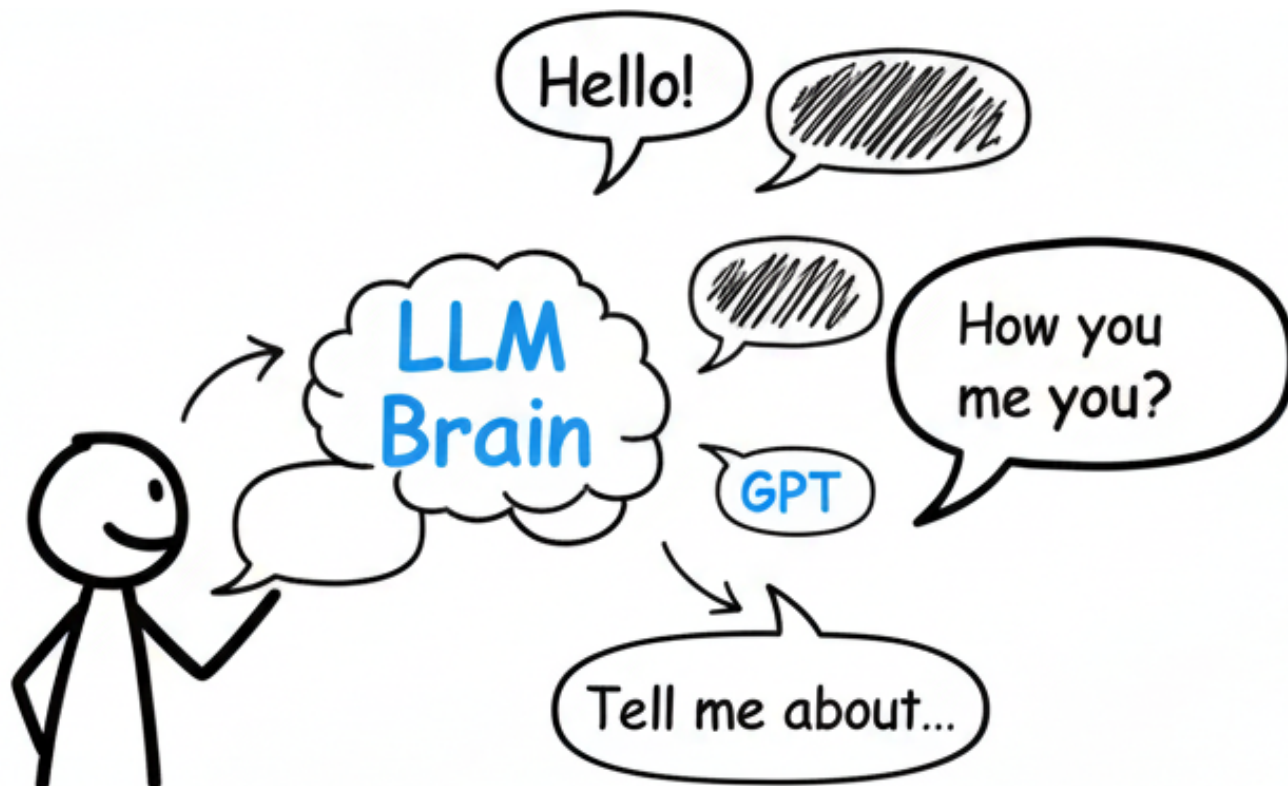

Your Conversational AI Assistant!

- Remember from Day 8: ChatGPT is Large Language Model (LLM).
- Its core power: understanding your input and generating human-like, contextually relevant text.

@learn.machinelearning

- It's not "searching" the internet in real-time (unless using web-browsing features/plugins); it's generating based on its vast training data.

GENERATIVE AI SERIES: DAY 10

Tip #1: Specificity & Context (Prompt Engineering Applied!)

- This is a direct application of Day 6!
- Vague: "Write about AI. (Generic output)"

@learn.machinelearning

Specific: "Act as a tech journalist. Write a catchy 3-paragraph article explaining difference between Narrow AI and General AI for non-technical audience. Include an analogy. Adopt a clear slightly humorous tone." (Excellent, tailored output)

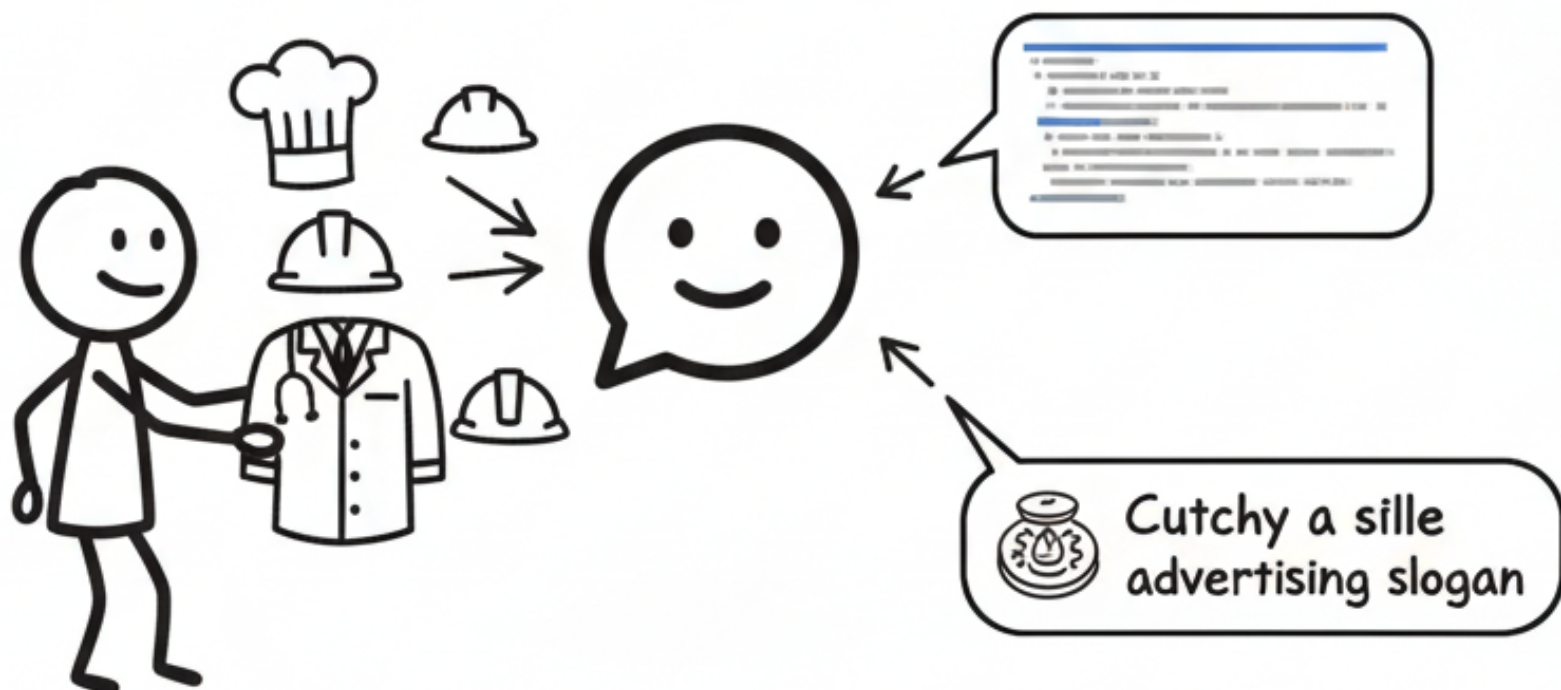

Tip #2: Assign a "Role" to ChaTGPT

Make CHTGPT act as an expert, and its answers will youch much better!

- Act as a senior software engineer...
- You are a master chef...
- As creative advertising copywriter...

Benefit: It focuss the AI's "knowledge" on relevant patterns and output styles.

Tip #3: Treat it Like a Conversation!

- Don't expect perfection on the first try.
- Send your first prompt.
- Refine: "That's good, now make it 20% shorter."
"Can you add a a action?"
"Generate 3 more ideas in different tone."
- This iterative feedback loop helps you steer the AI the perfect output.

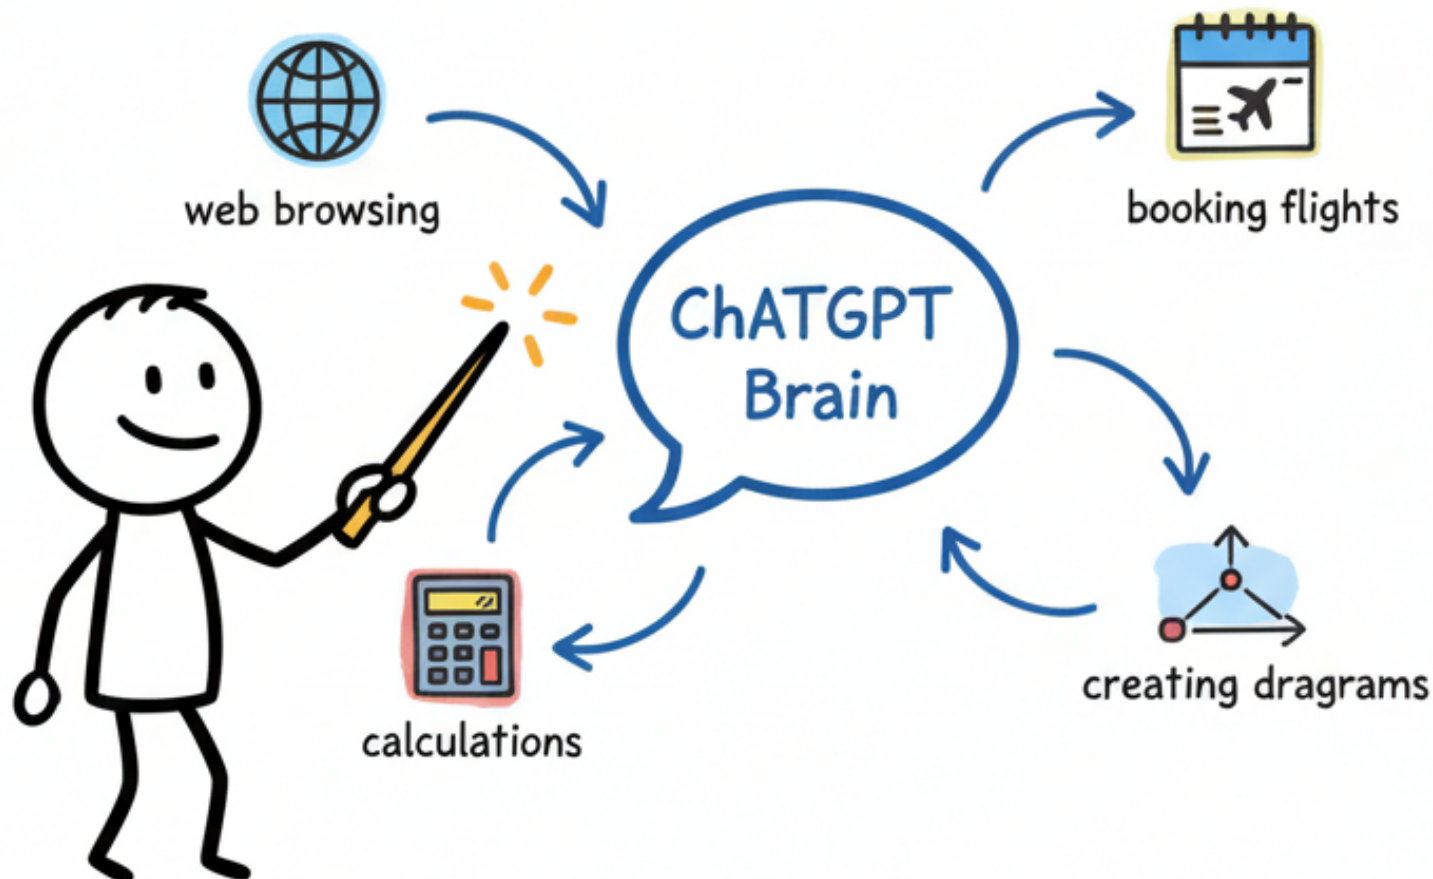

GENERATIVE AI SERIES: DAY 10

Power-Up! Introducing ChATGPT Plugins

- Plugins allow ChATGPT to interact to external tools and services, expanding its capabilities beyond just generating text.
- Examples: Browsing the internet, performing complex calculations, booking flights, interacting with databases.
- Think of them as "apps" for ChATGPT!
(Note: Requires a ChatGPT Plus subscription)
